

## Release notes for build 1.3.8063

Evaluation expires 30/7 2009

- Disable remote administration
- Additional security notification

## Disable remote administration

A new setting makes it possible to disable remote Node maintenance. When disabled a Node Manager is not able to modify Node Settings remotely.

## Additional security notifications

The notification security has been enhanced with the following settings:

- Display permanent modal dialog while manager is connected
- Display connection history list when Manager disconnects
- Play sound when managers connects or disconnects
- Play sound during connection
